APPLICATION 23889B

PERMIT 17995B

LICENSE _____

(over)

ORDER APPROVING A NEW DEVELOPMENT SCHEDULE,
CORRECT THE NAME OF THE SOURCE
AND PLACE OF USE AND AMEND THE PERMIT

WHEREAS:

1. Permit 17995B was issued to United Vintners, Inc. on August 21, 1980 pursuant to Application 23889B.
2. Permit 17995B was subsequently assigned to Heublein, Inc.
3. A petition for an extension of time within which to develop the project and apply the water to the proposed use has been filed with the State Water Resources Control Board (Board).
4. The permittee has proceeded with diligence and good cause has been shown for said extension of time.
5. A recent inspection of the project revealed the name of the source should be corrected to Bear Canyon and the description of the 85 acres in the place of use should be corrected to agree with the latest Quad maps.
6. Permit Condition 12 pertaining to the continuing authority of the Board should be updated to conform to Section 780(a), Title 23 of the California Code of Regulations.

NOW, THEREFORE, IT IS ORDERED THAT:

1. Condition 9 of the permit be amended to read:

COMPLETE APPLICATION OF THE
WATER TO THE PROPOSED USE
SHALL BE MADE ON OR BEFORE

December 31, 1999

(0000009)

2. The source is corrected under this permit to read as follows:

Bear Canyon tributary to Bale Slough thence Napa River

3. The place of use is corrected to read as follows:

10 acres within SW $\frac{1}{4}$ of NW $\frac{1}{4}$ of Section 16, T7N, R5W, MDB&M,
11 acres within SE $\frac{1}{4}$ of NW $\frac{1}{4}$ of Section 16, T7N, R5W, MDB&M,
14 acres within NE $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 16, T7N, R5W, MDB&M,
40 acres within NW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 16, T7N, R5W, MDB&M,
5 acres within SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 16, T7N, R5W, MDB&M,
5 acres within NE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Section 17, T7N, R5W, MDB&M,
85 acres total, as shown on map on file with the State Water Resources
Control Board.

4. Condition 12 of the permit be amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust. 5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 1.5 cubic feet per second to be diverted from March 1 to May 15 of each year. The maximum amount diverted under this permit shall not exceed 80 acre-feet per year. (0000005)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants. (0000006)

7. Actual construction work shall begin on or before two years from date of permit and shall thereafter be prosecuted with reasonable diligence, and if not so commenced and prosecuted, this permit may be revoked. (0000007)

8. Said construction work shall be completed on or before December 1, 1983. (0000008)

9. Complete application of the water to the proposed use shall be made on or before December 1, 1990. (0000009)

10. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until license is issued. (0000010)

11. Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit. (0000011)

12. Pursuant to California Water Code Sections 100 and 275, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to minimizing waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement such programs as (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation. (0000012)

13. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges. (0000013)

14. The State Water Resources Control Board reserves jurisdiction over this permit to impose any appropriate conditions at some future date to conform the permit to Board policy on use of water for frost protection. Action by the Board will be taken only after notice to interested parties and opportunity for hearing. (0000020)

15. This permit is subject to the agreement dated February 2, 1979 between permittee and Charles B. See, to the extent such agreement covers matters (0000300) within the Board's jurisdiction.

16. For the protection of fish life in Bear Canyon Creek and Bale Slough the permittee shall during the period from March 1 through May 15 bypass a minimum of 2 cubic feet per second. The total streamflow shall be bypassed whenever it is less than the designated amount for that period. (0140060)

17. No water shall be diverted under this permit until permittee has installed a device, satisfactory to the State Water Resources Control Board, which is capable of measuring the flow required by the conditions of this permit. Said measuring device shall be properly maintained. (0060062)

18. In accordance with Section 1603 and/or Section 6100 of the Fish and Game Code, no water shall be diverted under this permit until the Department of Fish and Game has determined that measures necessary to protect fishlife have been incorporated into the plans and construction of such diversion. The construction, operation, or maintenance costs of any facility required pursuant to this provision shall be borne by the permittee. (0000063)

19. Diversion of water between March 15 and May 15 shall be subject to control under a water distribution program administered by the State Water Resources Control Board or by the Department of Water Resources at any time such a program is in effect at the project location.

- A. Diversion after March 15 is contingent upon participation in the water distribution program by the permittee.
- B. No diversion is allowed after March 15, except to replenish water stored prior to March 15, unless otherwise authorized by the watermaster in charge of the distribution program.
- C. Prior to making diversions after March 15, permittee shall install and maintain a device, satisfactory to the watermaster, which is capable of measuring the instantaneous rate of diversion and the accumulative amount of water diverted during participation in the distribution program.
- D. Permittee's participation in any water distribution program required under the terms of this permit shall be evidenced by returning the information sheet distributed prior to the frost season and paying costs as apportioned at the end of the season.
- E. The water distribution program required under this permit may be revised periodically by the Board provided that the program shall be substantially consistent with terms of any water distribution program imposed on similarly situated users by the Napa County Superior Court. (0000085)

20. The total quantity of water diverted under this permit, together with that diverted under permit issued pursuant to Application 23889A, shall not exceed 160 acre per annum. (0000114)

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).
